Kimber 84L

WHAT ALL GUNS SHOULD BE™

MADE IN AMERICA

UNEQUALED QUALITY.

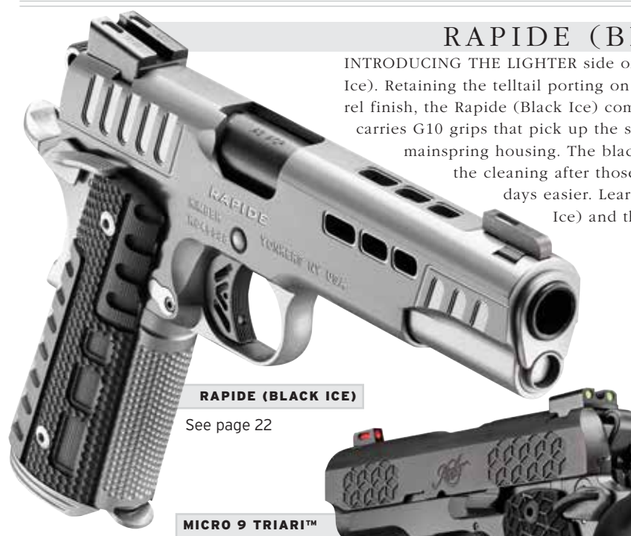

EVEN BEFORE THE FIRST KIMBER® rifle was completed some 41 years ago, manufacturing firearms of unequaled quality was already Kimber's singular goal. Do this, it was reasoned, and everything else will fall in line. On the strength of that commitment, Kimber has become the world's largest producer of 1911 pistols and the market leader in classic hunting rifles. Recent introductions of dynamic platforms like the EVO SP, Micro 9 and K6s handguns, along with PepperBlaster® less-lethal products, have established Kimber® as an innovator as well; a position that will continue to solidify as new firearms and accessories are launched. Quality is the true measure of value. Whether it means accuracy or dependability, the beauty of a finish or the precise fit of wood to metal, quality is an integral part of every Kimber.

NEW PRODUCTS

KIMBER'S EVER-EVOLVING QUEST to build premier U.S. manufactured firearms drives us to apply our signature quality, performance and reliability into new lines of handguns and rifles, along with the expansion of existing platforms. From concealed carry and personal defense to target shooting and game hunting, our constant pursuit of perfection pushes us—being the best is simply not good enough. That is why Kimber is What All Guns Should Be™.

RAPIDE (BLACK ICE)

INTRODUCING THE LIGHTER side of the Rapide—the Rapide (Black Ice). Retaining the telltail porting on the slide and contrasting barrel finish, the Rapide (Black Ice) comes in a third caliber, 9mm, and carries G10 grips that pick up the stair-stepped cuts on the slide and mainspring housing. The black DLC finish on the barrel makes the cleaning after those high round count competition days easier. Learn more about the Rapide (Black Ice) and the Rapide on page 22.

RAPIDE (BLACK ICE)

See page 22

MICRO 9 TRIARI™

See page 38

MICRO 9

ADORNED WITH A formation as refined as every Micro 9, the Micro 9 Triari™ is truly an excellent choice in a subcompact pistol. Low-glare black KimPro® II finish throughout makes it contrast starkly with the new Micro 9 Amethyst—a stunning addition to the Micro 9 platform.

MICRO 9 AMETHYST (NS)

See page 40

MADE IN AMERICA

K6S

THE ROYAL IS a classic finish on a 1911. But why stop there? We brought the look of a blued 1911 to the revolver platform and updated the finish to a high-polish black DLC. Ivory G10 grips are paired to further reference what is a benchmark look. Not sparing any detail, the K6s Royal comes with a brass bead front sight and white dot dovetailed rear sight. Learn more about the K6s Royal on page 48.

K6S ROYAL

See page 48

EVO SP STAINLESS RAPTOR

See page 28

EVO SP

KIMBER'S RAPTOR FINISH is a beloved thing. We couldn't resist bringing that same finish to our new striker fired platform with the EVO SP Stainless Raptor. Learn more about this and all EVO SP products on pages 26.

OPEN RANGE PRO CARBON

KIMBER AND LIGHTWEIGHT rifles are synonymous. 2020 brings a pairing of Proof Research™'s carbon-fiber wrapped barrels to our Open Range category—resulting in the Open Range Pro Carbon rifles in Granite and Gore® Optifade® Open Country stocks.

HANDGUN SELECTION GUIDE

SUGGESTED USE ICONS

Below and on the following pages you will find a suggested use based on the size and features of each gun. This icon does not necessarily mean a certain firearm is not suitable for other uses. Visit our website or call our customer service staff for questions.

CARRY
The features and size of these firearms are well-suited for personal defense situations.

HOME DEFENSE
The features and size of these firearms are well-suited for in-home defense.

MULTIPLE USE
These firearms are suitable for use in a variety of spaces, in and outside of the home.

TARGET
Topped with adjustable sights, these 1911s are well-suited for competition or a day at the range.

LE
The features on these firearms make them an excellent choice for duty carry.

HUNT
These models are well-suited for backcountry camp protection and handgun hunting.

MICRO™

.380 ACP pistols include many proven 1911 design elements that make them comfortable to carry, quick and safe to operate, and easy to shoot accurately. With a starting weight of 13.4 ounces and barrel length of 2.75 inches, they are well-suited for concealed carry. Mild .380 ACP recoil, smooth single-action trigger pull and well-designed sights make them a pleasure to shoot. They are also a perfect fit for any size hand.

- Short 2.75-inch barrel and thin profile ensures concealability
- With a starting weight of 13.4 ounces, Micro pistols are easy to carry
- Smaller grip dimensions provide a good fit for all hand sizes

MICRO 9™

pistols bring the 9mm caliber to our popular Micro family. Continuing with the concealable size and comfortable ergonomics of the Micro pistols, the Micro 9 pistols are equally safe and easy to shoot accurately. Only a small step up in size, they have a starting weight of 15.6 ounces and a barrel length of 3.15 inches. Manageable 9mm recoil, a smooth single-action trigger pull, available in a variety of finishes and sights, there is a Micro 9 for every shooter.

- Short 3.15-inch barrel and thin profile ensures concealability
- With a starting weight of 15.6 ounces, Micro 9 pistols are easy to carry
- Smaller grip dimensions provide a good fit for all hand sizes

ULTRA™

models are easy to conceal and comfortable to carry with their 3-inch bull barrels and short grips. Most frames are made from aluminum rather than steel to reduce weight. While light pistols do have a slight increase in felt recoil, this is minimized by Kimber's recoil system and unequaled 1911 ergonomics. Ultra pistols are the smallest and lightest 1911 pistols offered today, but Kimber quality helps ensure this does not compromise either dependability or accuracy.

- Barrel is just 3 inches long for easy concealment
- Short grip for concealability and comfortable carry
- Most Ultra models weigh just 25 ounces
- Available in 2 calibers

PRO™

models may be the best all-around 1911 configuration, combining a 4-inch barrel with a full-length grip. It is certain to be an ideal choice for concealed carry, personal defense or general use. Some have lightweight aluminum frames while others have heavier steel frames, and two models include the Kimber Tactical Rail™ for mounting lights and accessories. All have a near-perfect balance that makes shooting them easy, accurate and fun.

- Barrel is 4 inches long to optimize balance and concealability
- Full-length grip fits shooters with larger hands
- Frame options permit a model selection that meets multiple needs
- Available in 2 calibers

Each of these pistols overlays the image of a custom-size 1911 for comparison.

K6s®

models have a 6-round capacity, compact frame and cylinder, and a 2- or 3-inch barrel. Edges are rounded and blended so they are less likely to hang up on clothing. For those that require power in a small package with mild recoil, the K6s fits the bill as it is designed to handle both .357 Magnum and .38 Special +P ammunition. This makes them well-suited for backup or concealed carry.

- Compact 6-round capacity cylinder
- 2- or 3-inch barrel
- Ergonomic grip design for easy recoil control
- Available .357 Magnum/.38 Special

EVO SP™

models have a 3.16-inch barrel in a striker-fired, all-metal construction platform. Chambered in 9mm and shipping with a 7-round magazine, the EVO SP pistols are an excellent combination of the time-tested construction of an all-metal gun in an ultra reliable, striker-fired platform. All metal doesn't have to mean heavy—at just 19 ounces, the EVO SP has a user-configurable magazine release, a grip system that is scalable and requires no hardware, and it breaks down without a trigger press.

- 3.16-inch barrel length is subcompact and concealable
- Ships with 7-round magazine
- All-metal construction weighing only 19 ounces
- Available in 9mm

CUSTOM™

models are full-size 1911 pistols featuring a 5-inch barrel and full-length grip. The most popular configuration, they are favored by law enforcement professionals and competition shooters. Slightly heavier and with a greater distance between sights, they are easier to shoot accurately and have reduced felt recoil. The slim profile and outstanding 1911 ergonomics make them well-suited for duty, personal defense and general use.

- Full-length grip fits shooters with larger hands
- Barrel is 5 inches long for optimal velocity and accuracy
- Wide selection of models for any application
- Available in 4 calibers

LS

models are full-size 1911 pistols featuring a 6-inch barrel and full-length grip. An ideal configuration for competition or as a hunting side-arm, the Long Slide 1911s are a popular platform at the range and in the field because of their inherent accuracy and recoil-reducing weight.

- Full-length grip fits shooters with larger hands
- Barrel is 6 inches long for optimal velocity and accuracy
- Porting, optics installed, adjustable sights, rounded heel frame are among features on these models
- Available in 2 calibers

Each of these pistols overlays the image of a custom-size 1911 for comparison.

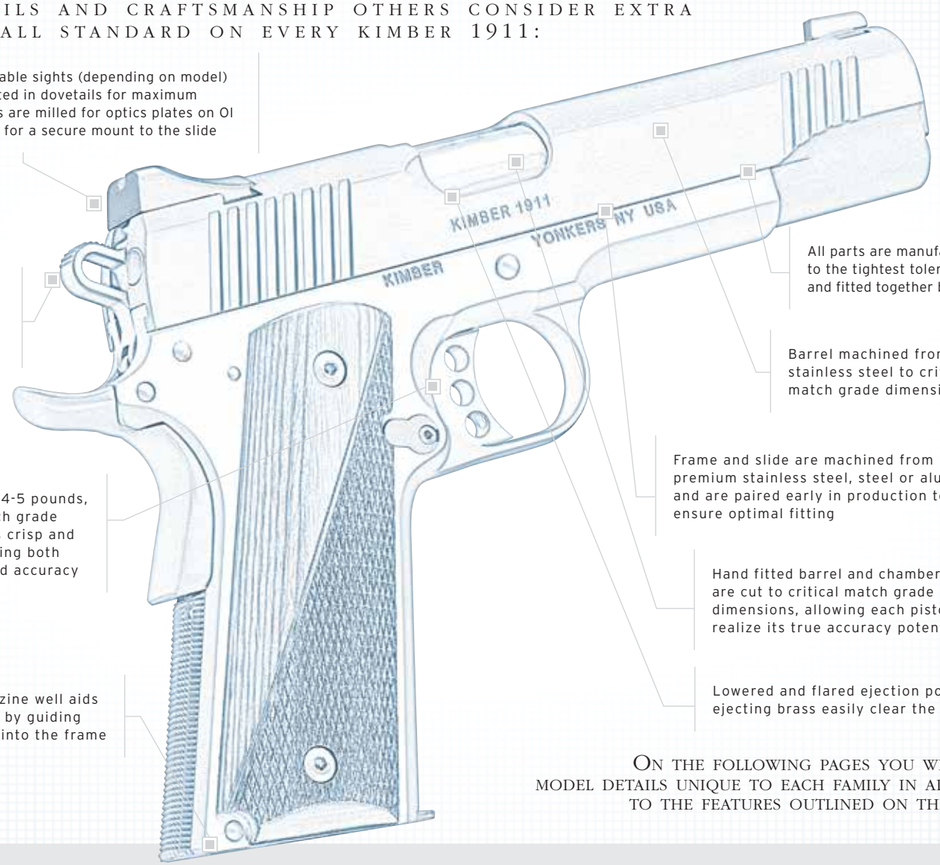

TRUST IS NOT GIVEN LIGHTLY,
IT'S EARNED IN THE FIELD

MADE IN AMERICA

ACCURACY, DEPENDABILITY and meaningful features determine the true quality of a pistol. On the strength of quality, Kimber® has become the world's largest producer of 1911 pistols. Compare a Kimber 1911 with any other brand—or any other type of semi-automatic—and see why Kimber is What All Guns Should Be™.

Details and craftsmanship others consider extra we call standard on every Kimber 1911:

Fixed or adjustable sights (depending on model) securely mounted in dovetails for maximum integrity. Slides are milled for optics plates on OI and OR models for a secure mount to the slide

Commander-style hammer will not cut or snag

With a pull of 4-5 pounds, Kimber's match grade trigger breaks crisp and clean, increasing both confidence and accuracy

Beveled magazine well aids fast reloading by guiding the magazine into the frame

All parts are manufactured to the tightest tolerances and fitted together by hand

Barrel machined from solid stainless steel to critical match grade dimensions

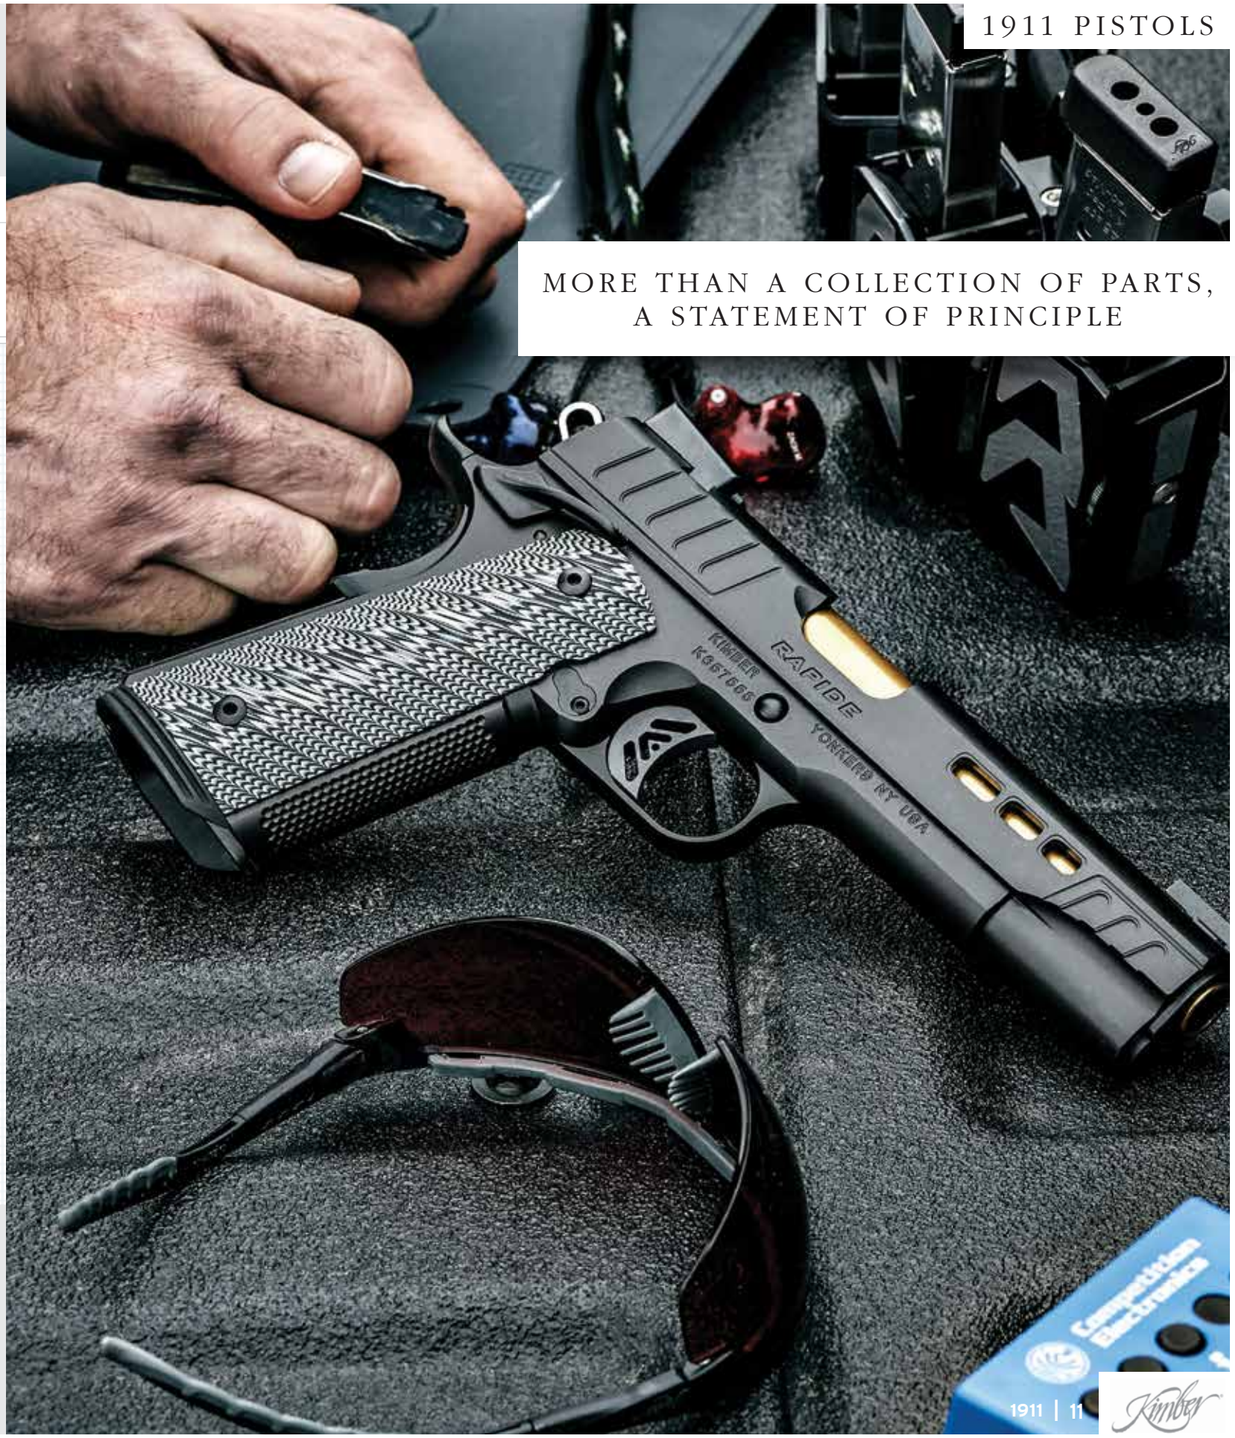

Frame and slide are machined from premium stainless steel, steel or aluminum and are paired early in production to help ensure optimal fitting

Hand fitted barrel and chamber are cut to critical match grade dimensions, allowing each pistol to realize its true accuracy potential

Lowered and flared ejection port lets ejecting brass easily clear the slide

On the following pages you will find model details unique to each family in addition to the features outlined on this page.

Kimber® builds the world's finest 1911 pistols to the tightest tolerances right here in America. Moreover, each critical component is manufactured inside the Kimber factories; getting it right means doing it yourself. The finest raw materials form the foundation and Kimber does the rest, ensuring every part meets unequaled standards. America's best shooters, including legendary SWAT units and United States Marines assigned to the U.S. Special Operations Command, have chosen Kimber for its quality, dependability and accuracy. So should you. Descriptions of each Kimber 1911 family of pistols are presented throughout the following pages. To locate your nearest Kimber Master Dealer or find complete descriptions of each model pictured in this catalog, visit kimberamerica.com.

More than a collection of parts, a statement of principle

KHX 1911S ARE loaded with features that set them apart. Hexagonal serrations on the slide and topstrap, Stiplex frontstrap surfacing, fiber-optic ledged sights, a partnership with the industry's leading grip company, Hogue®, has all the models wearing their unique G-Mascus® G10 grips and mainspring housings. Some models are available laser equipped, while full-size models carry their unique integral magwell/Magrip™ system. KHX Ultra, Pro, and Custom models wear the laser-equipped MagGrips that feature a red laser. Optics Ready (OR) models are milled to accept plates for some of the most popular mini red dot sights available today. Optics Installed (OI) models have the Trijicon RMR®06 Type 2 installed. Pro and Ultra models have a rounded heel frame for comfort and reduced printing during carry. Completely finished in KimPro® II gray with black small parts, these aggressively styled 1911s will find themselves at home on the range or on your person.

MAKING ITS DEBUT in 2018, the Aegis Elite has rounded heel frames and two-tone styling completed with G-10 Cyclone patterned grips make these standouts in any environment. AEX pattern serrations are a stylish answer to the practical need for grip surface during reloads. The Aegis Elite feature fiber optic sights on the Ultra, Pro, and Custom models, while the Optics Installed (OI) Pro and Custom models have the Vortex® Venom® Red Dot, with a 6MOA dot, milled and installed before leaving Kimber. Remaining true to Kimber's original purpose, this puts an otherwise custom gun within the reach of every shooter's hands.

THE ACCURACY, dependability and renowned Kimber features of this family set the standard against which all other 1911 brands and models are measured. Their legendary performance has made Kimber the world's largest producer of 1911 pistols. The Stainless II is built entirely from stainless steel while the Pro and Ultra models have stainless steel slides and lightweight aluminum frames. The Stainless Target (LS), an ideal competition pistol, brings the 6-inch barrel length and series I configuration to this benchmark family. Combine these foundations with the slim nature of the 1911 and you have the cornerstone in carry, accuracy, and concealability.

CDP (CUSTOM DEFENSE PACKAGE) pistols combine all the best carry features into a package that gives them their name. Adding these features during production reduces the price of these pistols by over $600, making them an incredible value. Featuring tritium night sights dovetail mounted on a stainless steel slide, flush cut barrel, and the lightweight aluminum frame has 30 lines-per-inch checkering on the front strap and trigger guard. The frame, slide and small parts wear our KimPro® II finishes that are self-lubricating and resistant to moisture and salt. The Carry Melt™ treatment rounds and blends edges so they will not hang up on clothing. The Ultra-sized pistol features a Round Heel Frame and flush-cut barrel. Available in 4 sizes and configurations for any concealed carry or personal defense application, CDP pistols have no equal for carry and defense—just what you expect from Kimber.

THE TLE (Tactical Law Enforcement) family of pistols is well-suited for duty carry, tactical applications and personal protection. This group of 1911s features an integrated mainspring lanyard slot, aggressive G-10 grips and a flat top slide. Created for and in cooperation with law enforcement and military experts, TLE models are professional tools outfitted with performance-enhancing features that also meet the defensive pistol needs of civilians. Available with barrels threaded for suppression, and a variety of rail and caliber options, the TLE family offers a configuration that meets almost any requirement. When you carry a Kimber, you carry with absolute confidence.

DESERT WARRIOR MODELS ARE HIGHLY REFINED technical pistols loaded with features that enhance real-world performance — they are the realization of the 1911 as a tool of military and law enforcement. The Kimber Tactical Rail permits the quick and secure mounting of accessories, Tactical Wedge night sights ensure low-light performance, and new G-10 grips as well as aggresive 24 lines-per-inch front strap checkering ensure a secure grip. Standard features include a military-length guide rod for quick field take-down, tough new KimPro® II self-lubricating finish, ambidextrous thumb safety and a lanyard slot for additional retention options.

THE COVERT .45 ACP PISTOLS are the perfect combination of light weight and meaningful features. With a gray color palette, flush-cut barrel and Round Heel Frame on Ultra models, Covert pistols feature both Crimson Trace Lasergrips® and Tactical Wedge tritium night sights; two sight systems that will ensure you acquire your sight picture regardless of light conditions. The 30 lines-per-inch front strap checkering with a bordered base helps ensure a positive grip even with cold, wet or gloved hands. The Carry Melt™ treatment contours, rounds and blends all edges so they will not snag on clothing or holsters. A bumped and grooved beavertail grip safety provides control under stress, while the mainspring housing with lanyard slot on the Custom and Pro models add an extra level of safeguard if needed. Kimber Covert quality ensures unequaled accuracy and dependability; there is no reason to be afraid of the dark.

RAPTOR PISTOLS TAKE their name from a combination of aggressive slide and frame serrations, feathered logo grips and special scaled texturing accents. While this patented design is unique, the features, dependability and accuracy are pure Kimber. Tritium night sights, ambidextrous thumb safety and a bumped and grooved grip safety are all standard with the Raptor family. Stainless Raptors offer a choice of calibers, 9mm or .45 ACP, and all Ultra models feature a Round Heel Frame. The quality of the Kimber 1911 rivals America's finest gunsmiths; hold a Raptor and see for yourself.

KIMBER CONTINUES IN ITS TRADITION of providing custom finishes and features that stand out in a crowd. Making a statement above and beyond the ordinary, Kimber Special Editions offer striking aesthetics, custom features, some carrying gem-tone finishes and all with the quality and dependability you expect. New for 2020 is a contrasting companion to our Rapide, the Rapide (Black Ice). With stunning attention to detail, carrying the stepped serrations throughout this competition ready 1911 while including features like slide lightening ports and an extended magwell make this pistol an ideal choice for those ready to race the timer. The gemstone collections feature polished PVD-finished slides and small parts. Slides are accented by intricate engraving and topped with tritium night sights. Coordinating grips are slim, allowing for increased hand contact for any size of hand. The RMEF® Camp Guard 10™, the ultimate backcountry protection, and Stainless II (Engraved Edition), a beautiful testament to skilled engraving, find themselves in good company with the Hero Custom—the result of a sponsorship with the Boot Campaign. With Kimber, performance and reliability are not compromised when unique finishing details are desired.

A CARRY EVOLUTION

MADE IN AMERICA

Kimber takes the next step with subcompact carry pistols seriously. The EVO Striker Pistol has been designed with critical defensive carry needs in mind. Feature-rich across the entire platform, the EVO SP elevates the striker-fired subcompact carry pistol beyond just basic black with a growing number of finishes and a grip system you can personalize to your palm. Shipped with premium sights and cocking serrations on the rear and front of the slide, there's just one thing left to do—carry it.

Superior features and details found on every Kimber EVO SP pistol:

On the following pages you will find details unique to each model in addition to the features outlined on this page.

At the heart of the handgun is a brand new striker-fire mechanism that delivers a smooth, crisp and consistent trigger pull from start to finish. Linking the shooter to the system is a full metal trigger and trigger safety that not only ensures accuracy but inspires confidence as well. An aluminum alloy frame provides overall integrity and a ridged platform for the deep crowned stainless steel barrel to rest in. Standard features for all models include a lowered and flared ejection port for enhanced ejection, a beveled magazine well for fast, positive loading, and night sights for fast target acquisition in any lighting level.

BUILT TO GO BEYOND

EVO SP

Ledged tritium night sights with high contrast front ring

Raptor scaled serrations on slide

G-10/Zebrawood hybrid grip and backstrap panels

Stainless steel slide and barrel feature FNC (Ferritic nitrocarburizing) finish. The slide is glass bead over FNC for the classic Stainless Raptor look.

KimPro® II silver finish on the frame

Unique scaling texture on front strap for additional grip confidence

C

EVO SP STAINLESS RAPTOR

NEW

THE FEATURES DETAILED ABOVE AND ON THE OPPOSITE PAGE ARE OFFERED IN ADDITION TO THE STANDARD FEATURES FOUND ON EVERY KIMBER EVO SP LISTED ON PAGE 26.

DESIGNED TO BE the ultimate choice in concealed carry pistols, EVO SP (Striker Pistol) was tailored by Kimber engineers to be the best shooting and most well equipped compact metal-framed pistol on the market. Not only was EVO SP machined to the tightest allowable tolerances, it was also put through multiple iterations of hands-on human factors testing to ensure the best possible user experience before finalizing the design. Standout features include an innovative grip system that eliminates hardware on the grip surface, a magazine release that can be configured for right- or left-handed shooters, a striker indicator that allows for both a visual and physical confirmation the striker is cocked, ledged night sights for single hand manipulations and a sight picture no matter the light conditions, a 6-7lb trigger with crisp reset, and shipping with two 7-round magazines. EVO SP is the ideal choice for shooters that demand a feature packed, compact-size, striker-fired firearm matched with all-metal construction.

DETAILS THAT SET US APART

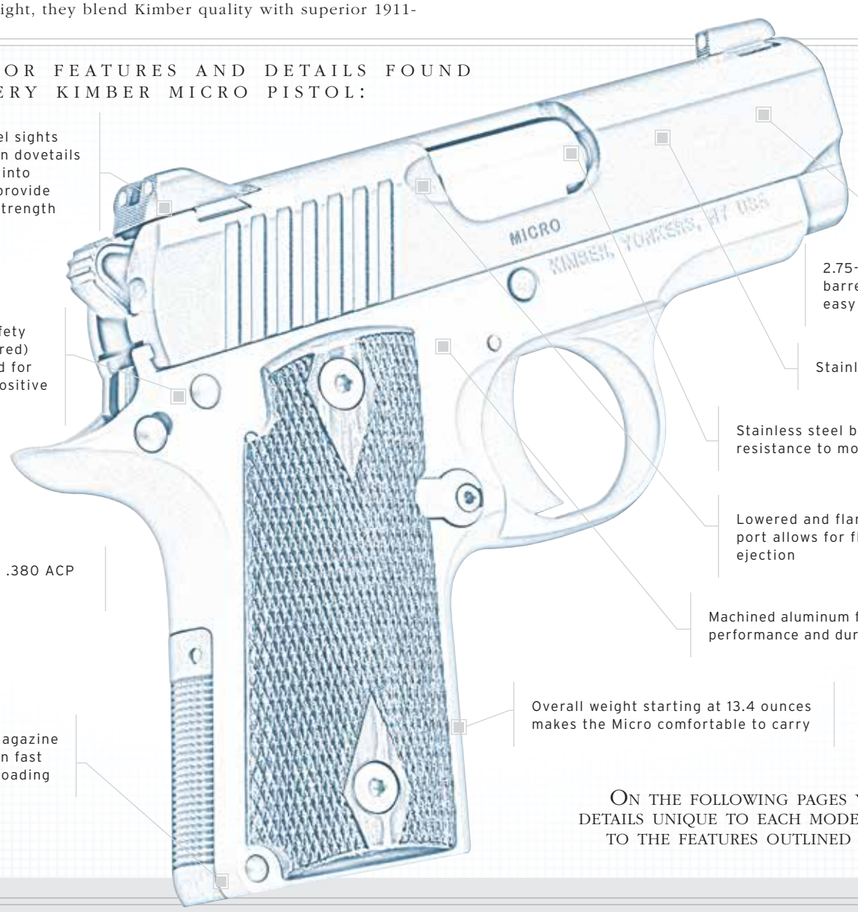

MICRO 9 TRIARI shown with 8 round extended magazine.

MADE IN AMERICA

MICRO™ .380 ACP AND 9MM PISTOLS bring an unmatched level of safety, dependability and performance to concealed carry. Small and light, they blend Kimber quality with superior 1911-like ergonomics and simple operation. Mild recoil and a smooth single-action trigger pull make them a pleasure to shoot.

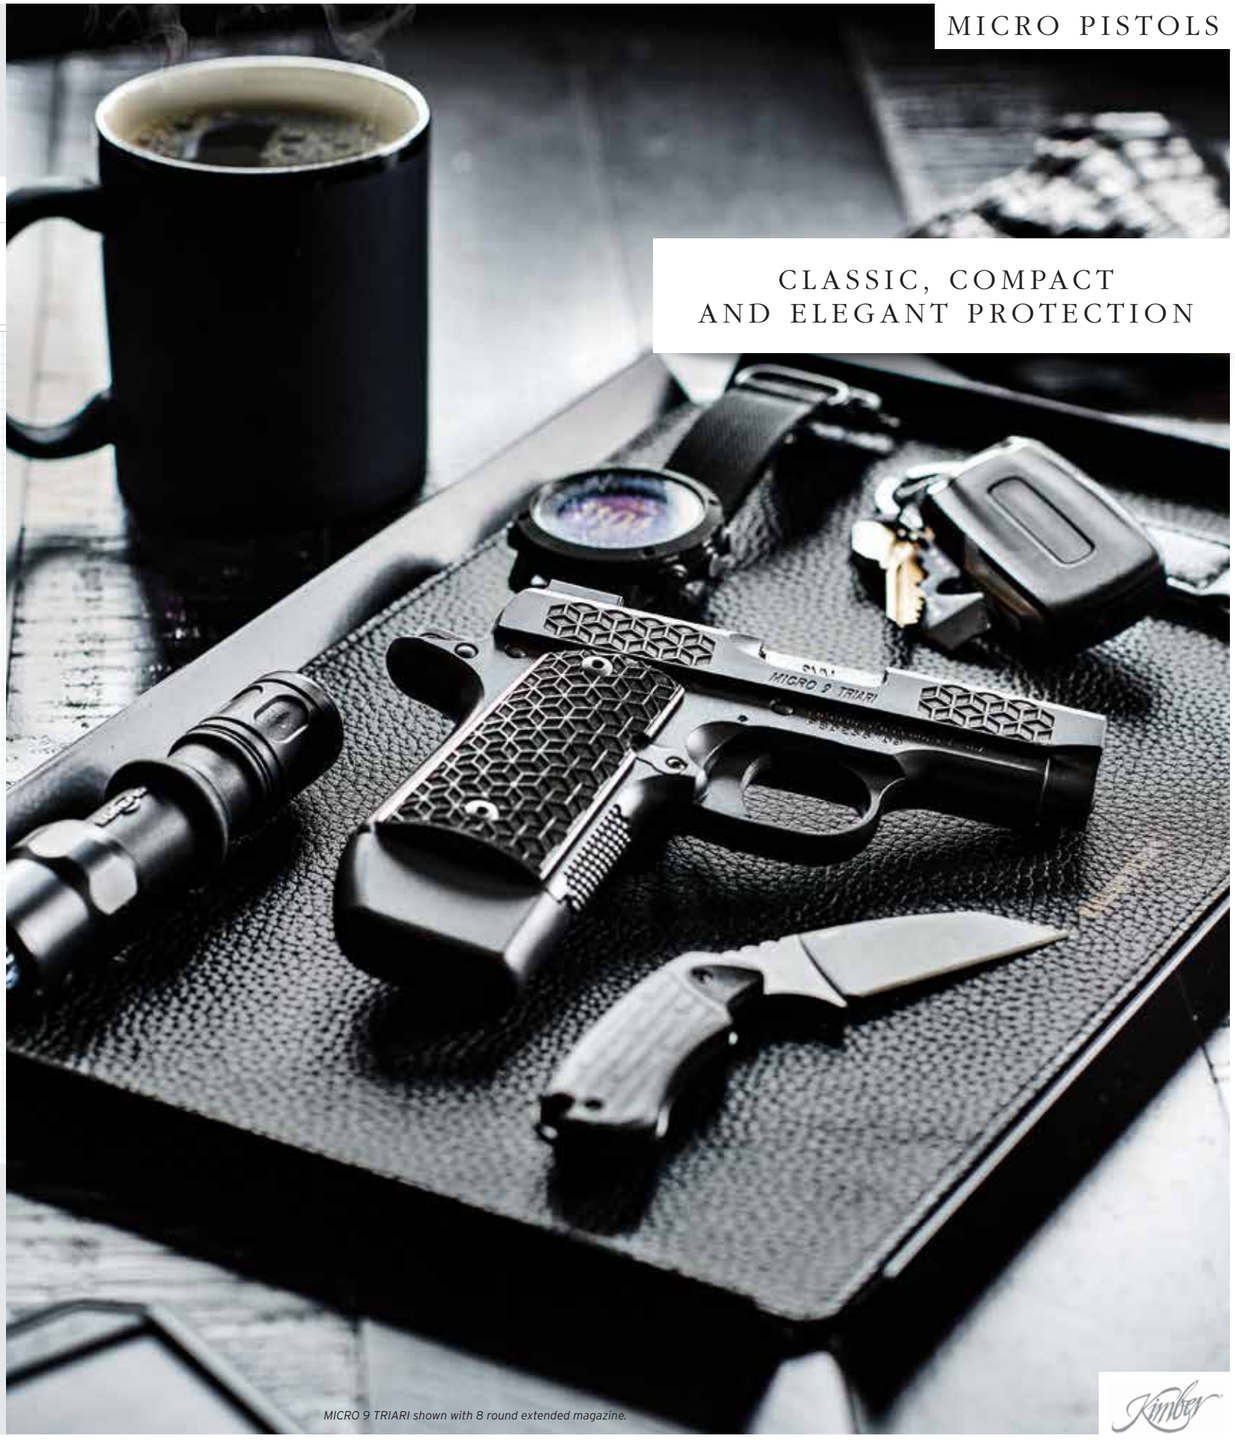

SUPERIOR FEATURES AND DETAILS FOUND ON EVERY KIMBER MICRO PISTOL:

- Large steel sights mounted in dovetails machined into the slide provide superior strength
- Thumb safety (not pictured) is serrated for smooth, positive operation
- Offered in .380 ACP and 9mm
- Beveled magazine well aids in fast and easy loading
- 2.75- to 3.1-inch barrel allows for easy concealability
- Stainless steel slide
- Stainless steel barrel increases resistance to moisture
- Lowered and flared ejection port allows for flawless ejection
- Machined aluminum frame enhances performance and durability
- Overall weight starting at 13.4 ounces makes the Micro comfortable to carry

ON THE FOLLOWING PAGES YOU WILL FIND DETAILS UNIQUE TO EACH MODEL IN ADDITION TO THE FEATURES OUTLINED ON THIS PAGE.

With a starting weight of 13.4 ounces and a barrel length of 2.75 inches, Kimber Micro™ .380 ACP and 9mm pistols are easy to carry and conceal. Micro barrels are machined from stainless steel for superior resistance to moisture, and all Micro frames are shaped from the finest aluminum for integrity and strength. In many respects a miniature 1911, the Micro offers important design advantages like a single-action trigger with a short, smooth pull that ensures accuracy and builds confidence. Its thumb safety, slide stop and magazine release are pure 1911 as well. Standard features include a lowered and flared ejection port for flawless ejection and a beveled magazine well for fast, positive loading. Sights are steel – not plastic – and mounted in machined dovetails for additional integrity. Each Micro includes an extended 7-round magazine; flush-fitting 6-round magazines are available. Well-suited for all shooters, including those with small hands and those who insist on mild recoil, Micro provides power for concealed carry, home protection and many other applications in our smallest platform yet. Best of all, they offer unequaled Kimber quality, dependability and performance.

WHEN QUALITY MATTERS

MADE IN AMERICA

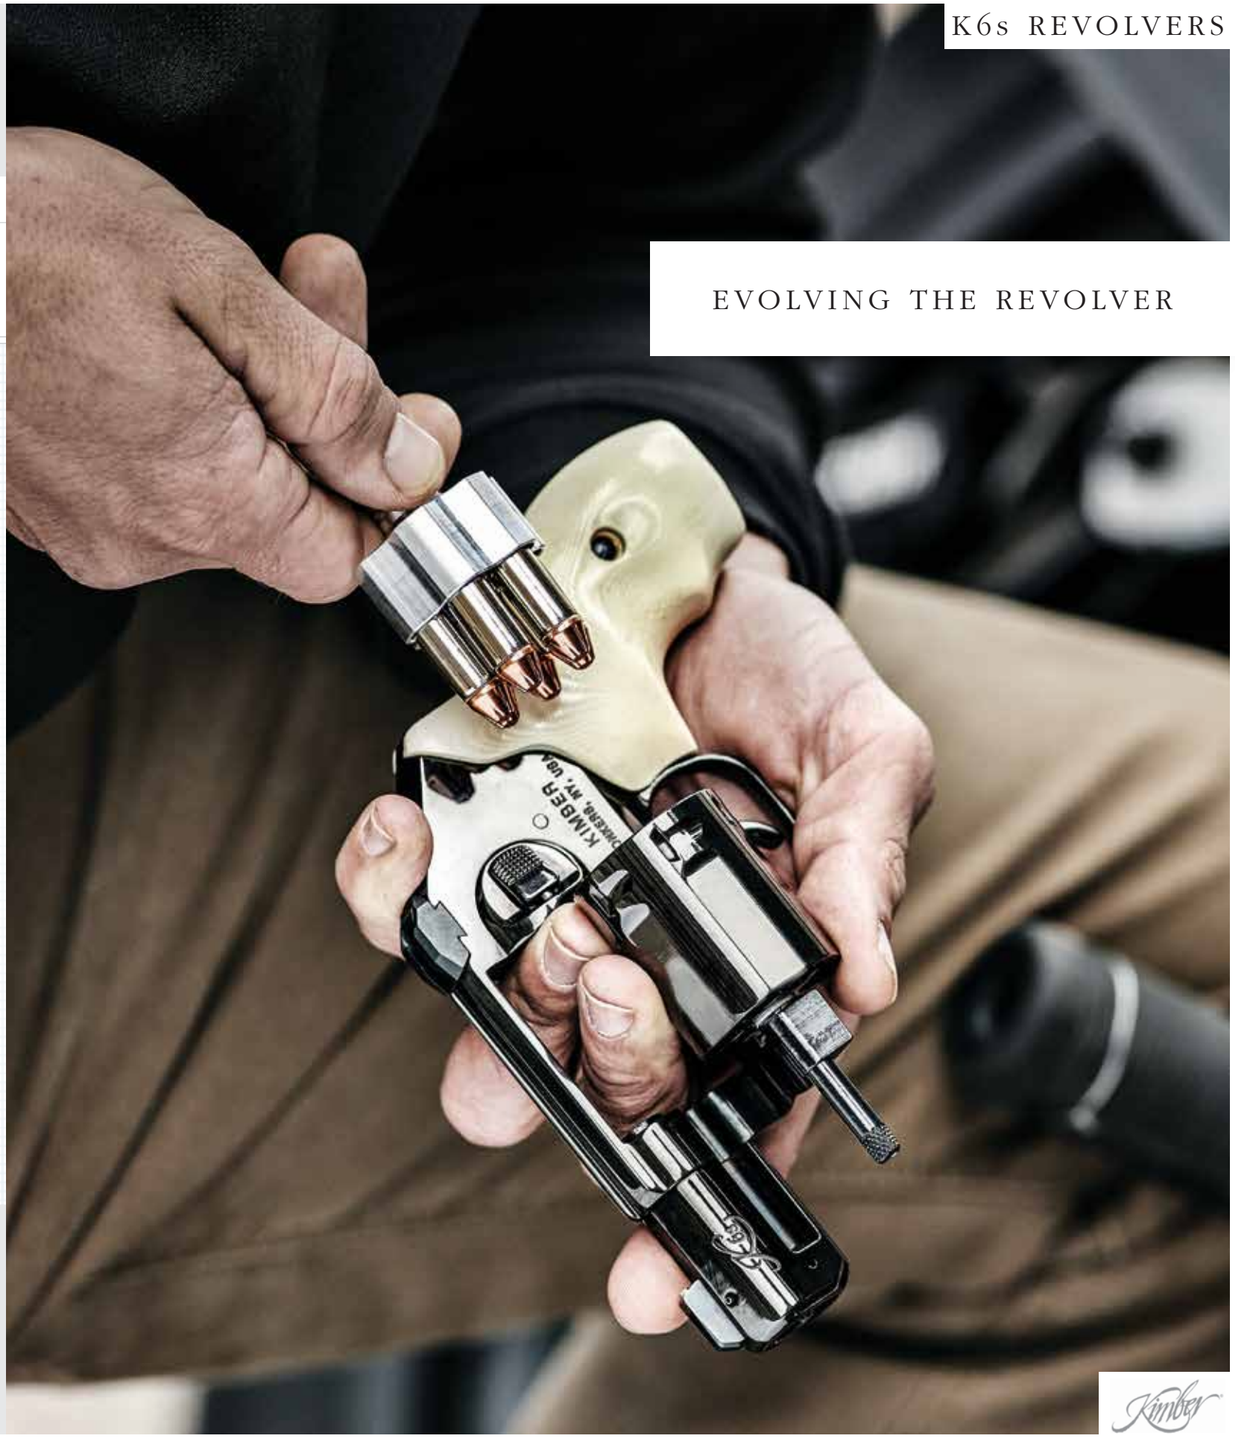

KIMBER K6s™ REVOLVERS set the bar for concealed carry revolvers by bringing an unmatched level of performance and shootability to concealed carry. Compact and light with the smallest .357 Magnum cylinder ever offered and a light, no-stack trigger, the K6s blends superior ergonomics and simple operation. Kimber K6s is the revolver of the next generation.

KEY FEATURES AND DETAILS THAT ARE FOUND ON ALL KIMBER K6s REVOLVERS:

- Removable front and rear sights
- Concealable profile with 6-round cylinder designed to minimal dimensions
- Smooth, no-stack double-action trigger of 9.5-10lbs. and for DASA models a crisp single-action trigger at 3-3.5lb
- Small and light, the K6s starts at 23 ounces
- Recessed chambers
- DAO or DA/SA models available
- Shooter-friendly ergonomics with push button cylinder release
- Serrated backstrap

THE KIMBER K6s™ IS AMONG THE MOST ACCURATE, shootable and dependable compact revolvers available today. Delivering on size and power, the K6s is the smallest 6-shot revolver on the market today that is specifically designed to fire .357 Magnum defensive ammunition. Mild recoil and a smooth double-action trigger pull make these revolvers a pleasure to shoot. Kimber engineers pushed the envelope to create the smallest and most comfortable .357 Magnum ever.

K6s REVOLVERS

THE FEATURES DETAILED ABOVE AND ON THE OPPOSITE PAGE ARE OFFERED IN ADDITION TO THE STANDARD FEATURES FOUND ON EVERY K6S LISTED ON PAGE 46.

With the smallest cylinder capable of holding 6 rounds of .357 Magnum (also compatible with .38 Special) offered today, K6s™ compact revolvers are well-suited for backup, concealed carry and home defense. The small frame, 2- and 3-inch barrel and 1.39-inch diameter cylinders are machined from the finest stainless steel for superior integrity, strength and resistance to moisture. The K6s offers important design features, including an advanced double-action trigger with a short, smooth, no-stack trigger that creates confidence while ensuring accuracy. Edges are rounded and blended to prevent hang up when the revolver is removed from concealment. 2020 brings the addition of the show-stopping K6s Royal. Finished in a liquid-like black oil DLC and paired with ivory G-10 grips—evocative of it's 1911 cousin—this revolver is an instant classic. For those who require a small package with mild recoil, K6s provides the power needed for concealed carry, home protection and many other applications. Best of all, the K6s revolver offers unequaled Kimber quality, dependability, and performance.

IT'S NOT JUST HUNTING

RIFLE SELECTION GUIDE

Custom details and features found standard on all Kimber rifles:

Straight comb stock design projects recoil into the shoulder, not up and over or into the cheekbone

Positive 3-position wing safety with serrated lever is the finest ever designed

Full-length Mauser claw extractor delivers superior controlled round feeding and extraction

Crisp, factory-set match-grade trigger

Four actions are designed around caliber families so you never have to carry more weight than you need

Barrel and chamber machined to critical match grade dimensions with rigid quality control ensures exceptional accuracy

Pillar and/or glass bedding provides strength and accuracy

Each proportioned action gives near perfect balance for fast, positive aiming

On the following pages you will find model details unique to each model in addition to the features outlined on this page.

THE KIMBER BRAND GOES BACK TO 1979, and its rifles have been favored by discriminating hunters and shooters ever since. Kimber offers a wide selection of classic sporting, hard-core hunting, unique varmint and no-compromise tactical rifles. Each is based on an action size designed with minimal dimensions for the cartridge's family. Accuracy is the best measure of rifle quality, and reliability follows. Each rifle is guaranteed under the Kimber SUB MOA Accuracy Standard.

SUB MOA ACCURACY STANDARD

*This dimension is 2.40 inches in actions chambered for .204 Ruger and .223 Rem.

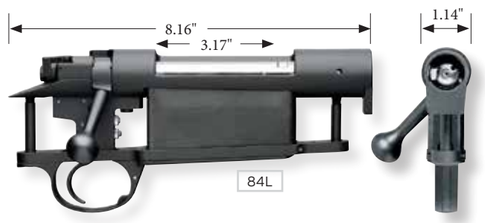

84M ACTION FEATURES

- The 84M (Medium) action has minimal dimensions for cartridges ranging from .204 Ruger to .308 Win.
- As part of the lightest production rifles available today, this action is built for short bolt travel and allows for faster operation
- Barrel is an optimal length for the flattest trajectory and superior accuracy
- Magazine capacity is 3-6 rounds, depending on caliber chambering
- Available in 9 models and 8 calibers

8400 SM ACTION FEATURES

- The 8400 SM (Short Magnum) action sized for Short Magnum cartridges has a greater diameter but remains as short as possible to reduce weight and ensure proper balance
- Barrel is the proper length for maximum velocity and flat trajectory
- Ideal for almost any North American big game
- Magazine capacity is 3-4 rounds, depending on caliber chambering
- Available in 4 models and 4 calibers

84L ACTION FEATURES

- The 84L (Long) action has the minimal diameter of the 84M but is slightly longer to fit America's most popular and powerful hunting cartridges, such as the .270 Winchester and .30-06 Springfield
- The lightest rifle in its class
- Barrel is an optimal length for the flattest trajectory and superior accuracy
- Magazine capacity is 3-5 rounds, depending on caliber chambering
- Available in 4 models and 3 calibers

8400 LM ACTION FEATURES

- The 8400 LM (Long Magnum) action has the additional length required by some of the world's most powerful cartridges, such as .300 Winchester Magnum and .375 H&H Magnum
- Suitable for hunting both large and dangerous game
- Barrel is the proper length for maximum velocity and balance
- Magazine capacity is 3-5 rounds, depending on caliber chambering
- Available in 5 models and 3 calibers

KIMBER RIFLES OFFER A COMBINATION OF FEATURES that set them apart from other production brands. Barrels, chambers and triggers are crafted with critical match grade dimensions for unmatched accuracy. All of Kimber's rifles are controlled-round feed. Pillar and glass bedding add strength and ensure that nothing shifts under recoil or during rough use. Walnut stocks are finished and checkered by hand, and reinforced carbon-fiber stocks are the finest worn by any production rifle. Descriptions of each rifle family are presented throughout the following pages, and more than 2,000 Kimber Master Dealers across America stand ready to assist in the selection of a model that will meet your needs. To locate your nearest Kimber Master Dealer, find complete information on each model or view product videos, please visit kimberamerica.com.

- 3 round capacity

THE FEATURES DETAILED ON THESE PAGES ARE OFFERED IN ADDITION TO THE STANDARD FEATURES FOUND ON EVERY RIFLE LISTED ON PAGE 54.

THE KIMBER HUNTER offers our legendary accuracy and performance paired with a synthetic stock and removable box magazine. Four models are available, the Hunter (Black) with barrel and receiver in low-profile, matte-black KimPro® II finish, the Hunter (Realtree™) in with a stock wrapped in Realtree Edge™ pattern, the Hunter (Boot Campaign) in Kryptek Highlander™, and finally the original Hunter with satin silver finished barrel and action. Paired with a barrel and action in a finish that controls light reflection and an incredibly popular pattern, the Hunter (Realtree Edge™) is a winning combination for our Eastern U.S. hunters. Our Boot Campaign rifle carries the Boot Campaign logo engraved on the barrel, and a portion of the proceeds go directly to this charity that works to help veterans across the United States. Chambered in a wide selection of calibers, this rifle family offers the ideal combinations for any type of game.

A TRUE MOUNTAIN RIFLE must be light and accurate—hard-core hunters understand. Montana™, Adirondack™, and Mountain Ascent™ models are the lightest production big-game rifles ever offered, delivering legendary Kimber accuracy yet still weighing as little as 4 pounds, 13 ounces. Hand-laid carbon-fiber stocks add strength, and stainless steel shrugs the elements. All Kimber Mountain rifles offer a threaded barrel for optional use of muzzle brakes and suppressors. Montana rifles combine all the best Kimber features in a lightweight, stainless steel and reinforced carbon-fiber package that helps ensure performance. Adirondack and Mountain Ascent models go even further. Featuring a combination of spiral fluted bolt body and hollow bolt knob, the Adirondack is compact for fast maneuvering. The Mountain Ascent has additional custom features, including a fluted barrel and muzzle brake to reduce felt recoil. Both wear Gore™ Optifade™ soft-touch stock treatments that blend into any environment and ship with Talley matte-black ring mounts. Optifade ring mounts and muzzle brake accessories are available separately. These rifles have no equal.

OUR OPEN RANGE RIFLES are the culmination of the premier technologies being offered in premium hunting rifles. New for 2020, the Open Range Pro Carbon rifle line provides the perfect balance of style and performance. AG Composites, the industry leader in stock technology, provides a reliable platform that is ultralightweight, supremely stiff, and impervious to the elements. At the pinnacle of modern barrel science, Proof Research's stainless steel, carbon-fiber wrapped barrels offer superior stiffness, reduced harmonic vibration, life-extending heat dissipation and 12 ounces of weight reduction. Single point cut rifling limits barrel stress and is preferred by many target shooters for its uniformity and close tolerances. Currently available in .308 Win. and 6.5 Creedmoor, the Open Range Pro Carbon rifles are true tack drivers for the most demanding hunter.

TRADITIONAL

CLASSIC SELECT GRADE

SUPERAMERICA

THE FEATURES DETAILED ON THESE PAGES ARE OFFERED IN ADDITION TO THE STANDARD FEATURES FOUND ON EVERY RIFLE LISTED ON PAGE 54.

KIMBER'S TRADITIONAL BIG-GAME RIFLES offer an unequaled combination of features, elegance and performance. All actions have minimal dimensions for the cartridges they chamber, permitting a trim overall profile that reduces weight by as much as 2 pounds. All traditional rifles include critical design features that ensure performance and dependability. Stocks are borne of fine walnut and then checkered and finished by hand. The elegant pillar and glass bedded sporter stock is carefully shaped and dimensioned from fine walnut for both recoil control and quick pointability. This properly dimensioned classic stock and recoil-absorbing 1-inch Pachmayr Decelerator® recoil pad diminish felt recoil. The Kimber-designed straight comb stock slides back into the shoulder, not up into the cheekbone. A sculpted steel bottom metal has a floorplate release inside the trigger bow that prevents accidental opening. Just as hunting is more than a sport, a Kimber traditional rifle is more than just a rifle.

A complete presentation of specifications and features begins on page 85.

KIMBER DANGEROUS GAME rifles deliver unwavering reliability and charge-stopping energy. Equally important, they have critical features absent from other production rifles in heavy calibers. The Caprivi™ is designed for Africa and the Talkeetna™ is ready for the unpredictable weather of Alaska—places where Kimber quality takes on a whole new level of importance. The Model 8400 Caprivi has a AA-grade French walnut stock with a hand-rubbed oil finish, 24 lines-per-inch wrap-around checkering, ebony forend tip and traditional pancake cheek piece. It also has a 3-leaf island express sight with the fixed leaf regulated for 50 yards. The Talkeetna has a stainless steel barreled action and reinforced carbon fiber stock—the finest ever offered in a production dangerous game rifle—and is mounted with a single-leaf express sight. Both the Caprivi and Talkeetna have a full-length Mauser claw extractor for true controlled-round feeding and extraction, plus a 3-position safety that is positive, quiet and fast. A barrel band sling swivel stud will not contact the forward hand during recoil. Front sights on both of these rifles are hooded and adjustable for elevation, and both folders remain green for custom regulation. These are the best production dangerous game rifles available, and the game they were designed to hunt deserve nothing less.

VARMINT AND HEAVY BARRELED RIFLES MUST DELIVER pinpoint accuracy with absolute consistency regardless of field conditions. This group of Kimber rifles ensures this level of performance through a combination of match grade components, careful bedding and proper design. Light to heavy, there is a Kimber varmint rifle for any type of predator hunting or varmint shooting. Varmint™ and Pro Varmint™ models are perfect for hunters who move and call. The Varmint configuration has a heavy target stock shaped from ultra-stable laminated wood blanks. Both models have sculpted steel bottom metal with a floorplate release inside the trigger guard, which is both functional and elegant.

KIMBER BUILDS NO-COMPROMISE tactical rifles to help meet the requirements of military or law enforcement professionals. In these arenas, the need for accuracy and dependability takes on a new meaning. Kimber tactical rifles have match grade barrels, chambers and triggers for the highest degree of accuracy. Each action features a full-length Mauser claw extractor for the superior dependability of controlled-round feeding plus an extended bolt handle with an oversized bolt knob for positive operation regardless of field conditions. Advanced Tactical SOC II rifles now ship with a McRee Precision custom stock for Kimber in two color options—FDE and Sniper Gray—they feature a left folding stock that allows for bolt manipulation while folded, a 4-point adjustable cheek weld for a versatile level of personalization, M-LOK® slots, tripod mount, and stock pack. The match grade dimensions of the Advanced Tactical™ SOC II and Advanced Tactical SRC II barrels are verified with an air gauge to ensure accuracy, and every rifle is built by hand, guaranteeing each to have fired 3-shot groups measuring .5 MOA prior to shipping. From a short, light configuration for fast deployment to heavier models with advanced features for long-range precision, Kimber tactical rifles are ready for anything.

A RIFLE FOR EVERY JOURNEY

OPTICS

A PERFECT MATCH for the Kimber Mountain Ascent™ and Adirondack™ rifles, the Zeiss Conquest V4 (offered in Gore™ Optifade™ Open Country and Elevated patterns) offers premium German optical performance and field versatility in a compact, lightweight yet rugged body. The newly enhanced optical design provides extremely bright images and contrast for precision shooting, even at high magnifications and in low light conditions.

PepperBlaster® II, (gray) in clear clamshell	LA98022	669278980225
PepperBlaster® II, (red) in clear clamshell	LA98021	669278980218

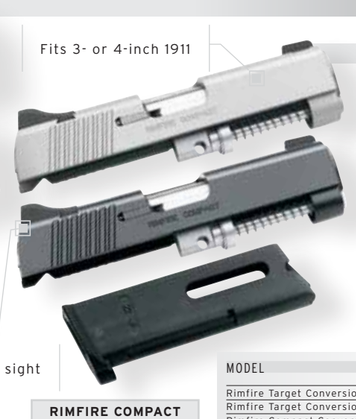

Caution: Strong irritant. Keep out of reach of children. May be unlawful to own or possess in some states or jurisdictions. Use for any purpose other than lawful self defense may be punishable by imprisonment, fines or both. PepperBlaster® protected by U.S. Pat. 6,951,070B2.

Technology, ergonomics and unmatched performance make PepperBlaster® II the most effective less-lethal protection available today. PepperBlaster isn't spray, it's better. Don't spray...shoot.

- A powerful solution of 10% Oleoresin Capsicum (OC) combines with benzyl alcohol to create the most effective inflammatory agent available. Effects are immediate and last up to 60 minutes.
- PepperBlaster® II uses patented Jet Protector Technology to propel two separate blasts of potent OC at 112 mph. This speed keeps each blast on target and reduces the risk of blowback or drift. Unlike sprays, PepperBlaster does not lose pressure over time.
- PepperBlaster II has an effective range of up to 13 feet, stopping threats at a distance. The unit does not have to be vertically indexed like sprays and can be fired from any angle or position.
- The non-aerosol pyrotechnic delivery system is not affected by cold or heat and blasts straight through wind and rain. This delivery system is capable of accurate placement and enough force to wrap around glasses or penetrate masks.

ACCESSORIES

.22LR CONVERSION KITS

Shooting a rimfire is an effective way to teach new shooters and enhance the training of others, regardless of their level of experience. Our Rimfire Target Conversion Kit™ (fits 4- and 5-inch barrel models) and Rimfire Compact Conversion Kit™ (fits 3- and 4-inch barrel models) are compatible with Kimber and most other MIL-SPEC 1911 pistols. Conversion kits are designed to operate with high velocity .22 LR ammunition. Adding a Rimfire Conversion Kit to any 1911 gives you two pistols in one and pays for itself in just a few hundred rounds.

MODEL	ITEM	CALIBER	BARREL (Inches)	WEIGHT (Ounces)

MAGAZINES

Kimber® pistol magazines are available in an assortment of finishes, sizes and calibers. 1911 magazines fit Kimber pistols, plus almost any brand and model of MIL-SPEC 1911. The KimPro® Tac-Mag® is the finest 1911 .45 ACP magazine available today. Each has a quick-change system that permits immediate attachment of three included bases, along with large round count holes that read at a glance. Two sizes of Micro™ and Micro 9™ magazines are available. Standard and extended options available for both.

GRIPS

Kimber offers a full selection of premium grips and Crimson Trace Lasergrips® that fit almost any brand of 1911 pistol, regardless of caliber. Many feature hand-cut checkering and hand finishing. Crimson Trace Lasergrips® are also available for Micro™ and Micro 9™ pistols. Premium hex head grip screw sets are offered separately and add a finishing touch.

LOGO GEAR

Kimber offers a wide variety of logo apparel and gear, and the selection is always growing. Visit store.kimberamerica.com for a complete presentation.

KIMBER CUSTOM SHOP

The Kimber Custom Shop™ can quickly and professionally modify or personalize any Kimber pistol. Services include installation of night sights, custom finishes, part replacement, checkering, melts, custom parts and tuning.

HOLSTERS

An assortment of fine leather holsters and magazine carriers with the Kimber logo are available for Kimber 1911, Micro™ and Micro 9™ pistols. Kimber holsters also may fit other brands of MIL-SPEC 1911 pistols.

RIFLE ACCESSORIES

A selection of scopes, mounting systems for any application, along with extended bolt handles, leather logo slings, patterned slings to match your rifles, and other items are available to complete your rifle set up.

FOOTNOTES

1. Weight can vary as much as 8 ounces due to natural walnut density.
2. Barrel length indicated on Mountain Ascent rifles does not include muzzle brake.
3. Advanced Tactical SRC II and Advanced Tactical SOC II rifles are shipped with one (1) 5-round detachable magazine. Additional 5- and 10-round magazines are available as an accessory.
4. Adirondack and Montana models have a threaded barrel and ship with a thread protector cap, but do not include a muzzle brake (which is available as an accessory). Adirondack also has a hollowed bolt knob.

Kimber® pistols and rifles are shipped with a California-approved cable lock as a safety measure. Additionally, 1911 pistols are shipped in a lockable high-impact case, and Micro, EVO SP, and K6s pistols are shipped in a lockable soft case. Use of the cable lock is encouraged at all times when a firearm is in storage. Kimber owners may request a free cable lock by mail. Please contact our customer service department at 888-243-4522.

Kimber firearms and less-lethal products should only be purchased and used in complete compliance with all laws; national, state and local. All suggestions for use in this catalog, or in any Kimber literature, must be taken within the context of these laws. Customers and dealers are required to comply with all applicable laws.

All Kimber centerfire 1911 pistols include the Loaded Chamber Indicator Port® feature. When a round is in the chamber and light is available, the brass or silver color of the shell casing should be visible through the port in the barrel hood. This feature is another example of Kimber's commitment to firearm safety. However, one must never assume a firearm is unloaded until both the chamber and magazine are empty and the magazine is removed. Even then, all established rules of firearm safety must always be followed. Micro pistols do not have the Loaded Chamber Indicator Port® feature.

Firearm safety is every gun owner's responsibility. Use and store all firearms safely. Teach everyone in your home, especially children, proper firearm safety.

Kimber less-lethal products contain a strong irritant (inflammatory agent) derived from cayenne peppers. Avoid contact with skin and eyes. In case of contact, flush with water for at least 15 minutes. Seek immediate medical attention if symptoms persist or worsen. Always keep Kimber less-lethal products out of the reach of children. There is risk of injury to eyes if used at less than the minimum safe distances specified in the product instruction manual. Kimber less-lethal products may be unlawful to own or possess in some states and jurisdictions. Check with your state and local authorities. Use of Kimber less-lethal products for any purpose except lawful self-defense may be a crime. U.S. PAT. 6,951,070B2.

Certain products may not be available for sale in certain states.
